## ABOUT ME

Dependable and self-motivated professional with proven experience working collaboratively to meet deadlines, looking to transition into a Junior Software Engineer position. Skilled in problem-solving, data analysis and project management.

## EDUCATION

- |  |  |
|--|--|
| ● University of New South Wales<br>2022 - 2023 | Graduate Certificate of Computing  |
| ● University of New South Wales<br>2015 - 2018 | Bachelor of Construction Management and Property<br>(Quantity Surveying) |

## PERSONAL PROJECTS

### Wedding RSVP Web App

Developed a full-stack RSVP management system for a wedding event, allowing guests to view the general information of the event. Guests can also submit or edit their record for attendance, dietary requirements, and age information.

#### Tech stack:

Next.js | React | Typescript | Prisma ORM | Tailwind CSS | PostgreSQL

- Implemented dynamic, pre-filled forms using React components and server-side actions with data validation and conditional logic for both updates and new entries.
- Integrated Prisma ORM with a normalised SQLite database for local development to ensure data integrity, including unique constraints across family and guest records. PostgreSQL is used for production deployment.
- Designed responsive and mobile-first UI with Tailwind CSS and DaisyUI, including the incorporation of Google Maps embeds and accessibility-friendly elements.
- Emphasised scalability and maintainability by modularising frontend components and optimising database interactions.
- Tracked app health & performance using observability tools in Vercel.

## TECHNICAL SKILLS

#### Languages:

Javascript/Typescript (ES6+) | HTML | CSS | SQL

#### Frameworks & Libraries:

Next.JS | Prisma ORM | Tailwind CSS | DaisyUI | React

#### Databases:

SQLite | PostgreSQL

#### Tools & Platforms:

Git | GitHub | Vercel
